

Urgent Care Association of America

Peggy Schultz, RN, MS

Peggy Schultz, a native Oregonian, was initially influenced by her sister-in-law as a young child to pursue a profession in nursing. She began her career during an exigent time in her life when she was diagnosed and treated for metastatic breast cancer. Since this time, she has practiced nursing for over 21 years in a variety of settings including legal chart review as an Independent Nurse Consultant. Peggy has worked for PeaceHealth Organization for more than 21 years and has a background in emergency and urgent care medicine, home infusion services, and Infection Control. Peggy supports Peace Health Medical Group in Emergency Preparedness and Pandemic Influenza planning and has trained at the Center for Domestic Preparedness, Noble Training Facility in Anniston, Alabama. She continues to excel in her career and is currently managing a 12 bed Urgent Care Clinic with over 33,000 patient visits per year.

Peggy has her Master's in Healthcare Administration from Bellevue University and a Bachelor's of Nursing from Oregon Health and Science University. She graduated Summa Cum Laude, received the Carol A. Lindeman Award, and was appointed as a biographical candidate into the Manchester's Who's Who among Executive and Professional Women in Nursing and Healthcare. Peggy is certified in Infection Control and Epidemiology which she continues to practice.

Peggy enjoys spending time with her grandchildren, doing research, reading, fishing, photography, travel, and her two Sphynx cats, Moe and Obie. She believes "dedication, hard work, and a little bit of luck are the keys to success".
